SUMMARY

Iam a front-end developer, seeking a job opportunity to increase my experience, skills and passion, excited to work with team, I have built a lot of projects that have increased my experience, I am a fast learner and always love to develop myself .

PROJECTS

All Experience obtained from college study and self study online parallel on institute education

Front end Developer   **Duration from 8 – 2018 to 7 – 2020**

I studied the skills which qualified me to be able to create an e-commerce website.

graduation project process :

- Graduation project is an e-commerce website
- Started from Participation in the ideas as thinking, research and content with my colleagues
- I planned the project on a sketch to imagine the user journey using inspiration ideas from websites
- I transformed the design into code using html, css, js, jquery and scss.

Desktop Developer   **Duration from 7 – 2017 to 8 – 2018**

I started as desktop Developer as my target was building new Package Microsoft office programs back then, so I increased learning and exercising on java & sql.

control room program process :

- Control room program manage exams.
- Program includes: sitting and secret numbers, calculate subjects degrees after clemency, failure subjects, Statistics.
- Statistics include Success and fail percentage for the band, pass and fail percentage for each subject, and for the oral and practical subjects.
- Finally: a Word file with the grades of the band students taking into account the descending order.
